

Printable Eclipse™

Printable Eclipse™ is a fast-drying, no-curl PET film with a bright white surface that provides superior ink adhesion and scratch and water-resistance. It features an embedded blockout layer that renders the print media virtually opaque, ensuring no light shows through while graphics are displayed. When laminated, the result is a durable graphic that withstands handling, rolling and shipping, and hangs straight and flat without edge fray. Printable Eclipse™ is ideal for retractable banner stands, pop-up displays, frame-supported graphics, and tradeshow/event graphics.

Compatible with Most Printers for Vibrant Images

Aqueous

PET films on a 3" core, including:

Printable Eclipse™ Matte

Printable Eclipse™ Matte is 7.5 mil (190μ) and available in widths up to 60" (1524mm).
