

ReTac® *TEXTURES*

Add Dimension To Your Graphics

EXPERIENCE TEXTURE

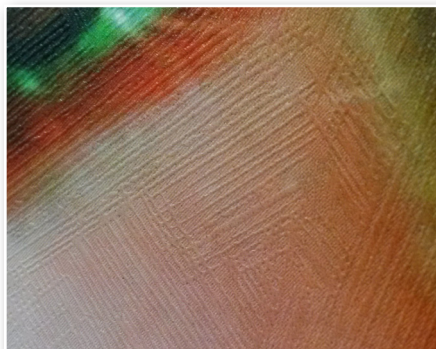

ReTac® Textures is a 6 mil (150μ) printable, matte white polymeric PVC film with ReTac® ultra removable adhesive. It has a variety of embossed finishes that add depth and visual appeal to static, flat graphics.

Subtle textures like linen and canvas draw attention to your image or message in a distinct and creative way while more unique, robust textures add dramatic flare.

With ReTac® on the back, eye-catching graphics printed on ReTac® Textures can easily be removed and re-positioned multiple times without the worry of adhesive residue being left behind. The film is also flame resistant according to FTMS 191, Method 5903.

It is ideal for custom wall murals, interior décor, retail displays, trade show graphics, and textured labels.

ReTac® Textures is compatible with (eco) solvent, UV and latex printers. Available in widths up to 54" (1372mm).
