

SilkScape™

Cost-effective print media for retractable banner stands

SilkScape™ is an economical, opaque banner material made of multi-layer polypropylene film. It has a satin matte finish with a single-sided, print receptive coating, and its curl-resistant properties allow for graphics to be vertically displayed without fraying.

This media is compatible with (eco) solvent, latex and UV printers. SilkScape™ is an ideal choice when combined with any of our retractable banner stands.

Key features and benefits include:

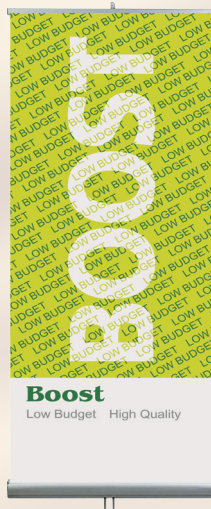

- Single-sided, printable white polypropylene
- 8 mil (200μ) thickness
- 99%+ opacity
- Less likely to curl, more stable
- Compatible with most printers
