

VIZIPRINT® IMPRESS

PRINTABLE WINDOW FILM

ADHERES
WHEN YOU NEED IT.
PEELS AWAY
WHEN YOU DON'T.

Our printable window film is designed for trouble-free installation of graphics on glass surfaces and is available in three versions:

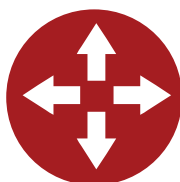

- ViziPrint® Impress Clear UVL*, a 4 mil (100μ) ultra clear PET film
- ViziPrint® Impress Clear SEL*, a 5 mil (125μ) ultra clear PET film
- ViziPrint® Impress White SEL, a 5 mil (125μ) white PET film

ViziPrint® Impress utilizes proprietary adhesion technology that creates a strong bond in both high and low temperatures without leaving residue behind. This adhesion technology also eliminates bubbling and is unaffected by moisture. Since it uses a mechanical bond to gently adhere images to windows, the glass stays clear and graphics stay bright whenever ViziPrint® Impress is re-positioned and re-applied. The film is ideal for high quality decals, signage and retail window advertising.

ViziPrint® Impress Clear UVL is compatible with UV and latex printers. ViziPrint® Impress Clear SEL and ViziPrint® Impress White SEL are compatible with (eco) solvent, UV and latex printers. Available in widths up to 60" (1524mm).
