

ViziPrint® Deco

*Define Your Space
with Decorative Details*

ViziPrint® Deco is a 2 mil (50μ) optically clear gloss PET film with a permanent acrylic adhesive. The high quality adhesive adheres to most substrates, including glass surfaces. When applied to windows, the film's clarity is enhanced by the super smooth profile of its siliconized release liner.

This printable window film utilizes a special ink-receptive top coat for greater adhesion of inks, and it can be used to create graphics and window decals for retail storefronts and POP or backlit displays. ViziPrint® Deco is ideal for architectural applications where decorative glass details are needed to create dynamic spaces, including conference rooms or private meeting areas.

ViziPrint® Deco is compatible with UV and latex printers. Available in widths up to 61" (1549mm).
